EMOTIONALLY FOCUSED THERAPY

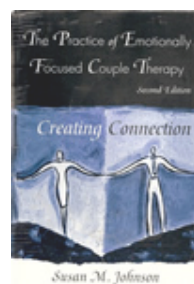

is a short-term, structured and tested approach to reduce stress in adult love relationships and create more secure attachment bonds. It is also used with families. Formulated in the 1980's it is growing in popularity across North America and internationally. Research shows that 70-75% of couples move from distress to recovery and approximately 90% show significant improvements.

An Externship includes presentations of theory and clinical techniques and skills, training exercises, video recordings of EFT with couples, observation of live interviews and discussion of specific cases, and clinical issues.

Participants learn:

- To see marital distress from an attachment perspective
- To help partners reprocess the emotional responses that maintain marital distress
- To shape key new interaction and bonding events, and
- To overcome therapeutic impasses.

This 30-hour/four-day course covers the fundamentals of EFT and is the first step toward becoming certified as an EFT therapist. An extensive manual will be provided. Participants are strongly encouraged to read *The Practice of Emotionally Focused Couple Therapy: Creating Connections* (2004), by Dr. S. Johnson before coming to the externship.

This externship is offered in conjunction with Dr. Susan Johnson and the International Centre for Excellence in Emotionally Focused Therapy, Ottawa, Canada (ICEFFT). The training fulfills the initial externship requirement for certification in Emotionally Focused Therapy (EFT). See www.eft.ca

Follow-up courses and supervision will be available.
